

Why Synoptix?

You need a powerful, collaborative financial reporting solution created for your data, company, & complex demands. Synoptix software includes CollabX, a dynamic tool which allows you to see the story behind the numbers & streamline your communication between departments within your reports. You can upload supporting documentation, add conversation notes & important comments all around each & every balance. You can even schedule due dates for your recipient to reply. This tool gives you the power to centralize communication & ensure your entire team is on the same page, with complete knowledge of where you've been & where you need to go.

About Us

Synoptix is a leading innovator of business intelligence software designed to make your complex reporting needs easy. Fully featured without needing to rely on IT, you get access to your real-time data when you need it with complete drill down functionality. And no matter the source - whether it be from multiple ERPs, spreadsheets, or other data points. Stop wasting time trying to find your data; spend your time managing it.

CollabX Features

- ✓ Streamline Team Communication
- ✓ Upload Support Documents
- ✓ Schedule Reply Due Dates
- ✓ Store Conversation Threads

“

Parent companies of any industry could use Synoptix to corral, link, and report. This allows them to report together in one place.
